Dear Sir,

**Sub : Infrastructural Facilities at Rajarhat**

As, informed to you from time to time, that Rosedale Project would be ending by third quarter of this year. And the infrastructural facilities like electricity, water, sewerage, drainage, road, telecommunication, transportation, security etc. are still in the infancy stage. Being part of Rosedale Management, it is a great concern to us as how the customers of Rosedale Project would reside their without these basic facilities.

We are getting tremendous pressure from our customers as we have to provide them update about the New Town, Rajarhat infrastructural condition from time to time.

We would be grateful, if we get a written confirmation about the exact time when the said infrastructural facilities would be ready, so that we can communicate this to all our members.

We would appreciate, if you can send your reply with confirmation within 10 days which would really help us to tackle the pressure.

Thanking you,

Yours faithfully,

*S. K. Mukherjee*
